

Index to Volume 183

Al-Hassani M, *see* Natarajan V *et al.*

Ali MK, *see* Moin S *et al.*

Anand-Srivastava MB, *see* Wang R *et al.*

Avila J, *see* Moreno FJ

Barriga C, *see* Collazos ME *et al.*

Barriga C, *see* García García JJ *et al.*

Bkaily G, Naik R, Jaalouk D, Jacques D, Economos D, D'Orléans-Juste P, Pothier P: Endothelin-1 and insulin activate the steady-state voltage dependent R-type Ca^{2+} channel in aortic smooth muscle cells via a pertussis toxin and cholera toxin sensitive G-protein

39–47

Cam MC, *see* Li WM *et al.*

Carlson KD, *see* Taylor A *et al.*

Catalá A, *see* Zanetti R

Chamberlain NL, *see* Daum G *et al.*

Chugh L, *see* Sehra S *et al.*

Clowes AW, *see* Daum G *et al.*

Collazos ME, Ortega E, Barriga C, Rodríguez AB: Seasonal variation in haematological parameters in male and female *Tinca tinca*

165–168

Coumans WA, *see* Van der Vusse GJ *et al.*

Dakshinamurti K, *see* Kannan S *et al.*

Daphna E-M, Michaela S, Eynat P, Irit A, Rimón S: Association of myeloperoxidase with heparin: Oxidative inactivation of proteins on the surface of endothelial cells by the bound enzyme

55–61

Daum G, Levkau B, Chamberlain NL, Wang Y, Clowes AW: The mitogen-activated protein kinase pathway contributes to vanadate toxicity in vascular smooth muscle cells

97–103

Dhalla NS, *see* Kannan S *et al.*

Dibrov P, Young PG, Fliegel L: Physiological consequences of expression of the Na^+/H^+ antiporter *sod2* in *Escherichia coli*

125–132

Dietzmann K, *see* Kuznetsov AV *et al.*

D'Orléans-Juste P, *see* Bkaily G *et al.*

Drake-Holland AJ, *see* Van der Vusse GJ *et al.*

Dubelaar M-L, *see* Van der Vusse GJ *et al.*

Dudás J, *see* Kovalszky I *et al.*

Economos D, *see* Bkaily G *et al.*

Elimban V, *see* Kannan S *et al.*

Eynat P, *see* Daphna E-M *et al.*

Fliegel L, *see* Dibrov P *et al.*

Gangal SV, *see* Sehra S *et al.*

García García JJ, Barriga C, Rodríguez AB, Ortega E: Effect of polar glycopeptidolipids from *Mycobacterium Chelonae* (GPLp-Mc) on phagocytosis and superoxide anion production of macrophages from mice. Influence of physical activity

159–163

Gellerich FN, *see* Vagina O *et al.*

- Ghahary A, Shen YJ, Wang R, Scott PG, Tredget EE: Expression and localization of insulin-like growth factor-I in normal and post-burn hypertrophic scar tissue in human 1-9
- Giri S, *see* Sharma S *et al.*
- Grover AK, *see* Shah KA *et al.*
- Iozzo RV, *see* Kovalszky I *et al.*
- Irit A, *see* Daphna E-M *et al.*
- Jaalouk D, *see* Bkaily G *et al.*
- Jacques D, *see* Bkaily G *et al.*
- Jeney A, *see* Kovalszky I *et al.*
- Kadiata MM, *see* Ladrière L *et al.*
- Kannan S, Elimban V, Dakshinamurti K, Dhalla NS: Biophysical characterization of rat cardiac $\text{Ca}^{2+}/\text{Mg}^{2+}$ -ecto-ATPase (Myogelin) 153-157
- Kaplun VV, *see* Tertov VV *et al.*
- Khuller GK, *see* Sharma S *et al.*
- Kirk O, *see* Ladrière L *et al.*
- Klaus S, *see* Taylor A *et al.*
- Kopper L, *see* Kovalszky I *et al.*
- Kovalszky I, Dudás J, Oláh-Nagy J, Pogány G, Tövény J, Timár J, Kopper L, Jeney A, Iozzo RV: Inhibition of DNA topoisomerase I activity by heparan sulfate and modulation by basic fibroblast growth factor 11-23
- Kulkarni SK, *see* Reddy DS
- Kunz WS, *see* Kuznetsov AV *et al.*
- Kuznetsov AV, Winkler K, Wiedemann FR, von Bossanyi P, Dietzmann K, Kunz WS: Impaired mitochondrial oxidative phosphorylation in skeletal muscle of the dystrophin-deficient mdx mouse 87-96
- Kunz WS, *see* Kuznetsov AV *et al.*
- Ladrière L, Kadiata MM, Kirk O, Malaisse WJ: Stimulation by hexose esters of lactate production by rat erythrocytes: Insensitivity to 3-O-methyl-D-glucose and inhibition by 2-deoxy-D-glucose and its tetraacetic ester 175-182
- Levkau B, *see* Daum G *et al.*
- Li WM, Cam MC, Poucheret P, McNeill JH: Insulin-induced Glut4 recruitment in the fatty Zucker rat heart is not associated with changes in Glut4 content in the intracellular membrane 193-200
- Linden G, *see* Taylor A *et al.*
- Liu Y, *see* Wang R *et al.*
- Malaisse WJ, *see* Ladrière L *et al.*
- Manchester K, *see* Mouat MF
- McNeill JH, *see* Li WM *et al.*
- Michaela S, *see* Daphna E-M *et al.*
- Mitra S, Singh M: Possible mechanism of captopril induced endothelium-dependent relaxation in isolated rabbit aorta 63-67
- Moin S, Ali MK, Siddiqui MU, Tayyab S: Erythrocytes from healthy smokers bind more bilirubin than the erythrocytes from healthy non-smokers 211-223
- Moreno FJ, Avila J: Phosphorylation of stathmin modulates its function as a microtubule depolymerizing factor 201-209
- Mouat MF, Manchester K: An α subunit-deficient form of eukaryotic protein synthesis initiation factor eIF-2 from rabbit reticulocyte lysate and its activity in ternary complex formation 69-78
- Naik R, *see* Bkaily G *et al.*
- Natarajan V, Vepa S, Shamlal R, Al-Hassani M, Ramasarma T, Ravishankar HN, Scribner WM: Tyrosine kinases and calcium dependent activation of endothelial cell phospholipase D by diperoxovanadate 113-124
- Noble MIM, *see* Van der Vusse GJ *et al.*

- Obholz K, *see* Taylor A *et al.*
 Oláh-Nagy J, *see* Kovalszky I *et al.*
 Orekhov AN, *see* Tertov VV *et al.*
 Ortega E, *see* Collazos ME *et al.*
 Ortega E, *see* García García JJ *et al.*
- Pogány G, *see* Kovalszky I *et al.*
 Pothier P, *see* Bkaily G *et al.*
 Poucheret P, *see* Li WM *et al.*
- Ramasarma T, *see* Natarajan V *et al.*
 Ravishankar HN, *see* Natarajan V *et al.*
 Reddy DS, Kulkarni SK: Inhibition of neuronal nitric oxide synthase (n-cNOS) reverses the corticotrophin-induced behavioral effects in rats 25-38
 Rimón S, *see* Daphna E-M *et al.*
 Rodríguez AB, *see* García García JJ *et al.*
- Sadiev S, *see* Taylor A *et al.*
 Samson SE, *see* Shah KA *et al.*
 Sauvé R, *see* Wang R *et al.*
 Scott PG, *see* Ghahary A *et al.*
 Scribner WM, *see* Natarajan V *et al.*
 Sehra S, Chugh L, Gangal SV: Role of liposomes in selective proliferation of splenic lymphocytes 133-139
 Shah KA, Samson SE, Grover AK: Effects of peroxide on endothelial nitric oxide synthase in coronary arteries 147-152
 Shamlal R, *see* Natarajan V *et al.*
 Sharma S, Giri S, Khuller GK: Ca²⁺/calmodulin dependent protein kinase from *Mycobacterium smegmatis* ATCC 607 183-191
 Shen YJ, *see* Ghahary A *et al.*
 Siddiqui MU, *see* Moin S *et al.*
 Singh M, *see* Mitra S
 Smith CCT, *see* Van der Vusse GJ *et al.*
 Steinfath M, *see* Van der Vusse GJ *et al.*
- Taylor A, Obholz K, Linden G, Sadiev S, Klaus S, Carlson KD: DNA sequence and muscle-specific expression of human *sarcosin* transcripts 105-112
 Tayyab S, *see* Moin S *et al.*
 Tertov VV, Kaplun VV, Orekhov AN: *In vivo* oxidized low density lipoprotein: Degree of lipoprotein oxidation does not correlate with its atherogenic properties 141-146
 Timár J, *see* Kovalszky I *et al.*
 Tövényi J, *see* Kovalszky I *et al.*
 Tredget EE, *see* Ghahary A *et al.*
- Ulbrich-Hofmann R, *see* Vagina O *et al.*
- Vagina O, Gellerich FN, Ulbrich-Hofmann R: The effect of hexadecylphosphocholine on the degradation of mitochondrial phospholipids 169-173
 Van der Vusse GJ, Dubelaar M-L, Coumans WA, Steinfath M, Smith CCT, Drake-Holland AJ, Noble MIM: Depletion of endogenous dopamine stores and shift in β -adrenoceptor subtypes in cardiac tissue following five weeks of chronic denervation 215-219
 Vepa S, *see* Natarajan V *et al.*
 Von Bossanyi P, *see* Kuznetsov AV *et al.*
- Wang R, *see* Ghahary A *et al.*

- Wang R, Liu Y, Sauvé R, Anand-Srivastava MB: Hyperosmolality-induced abnormal patterns of calcium mobilization in smooth muscle cells from non-diabetic and diabetic rats 79-85
- Wang Y, *see* Daum G *et al.*
- Wiedemann FR, *see* Kuznetsov AV *et al.*
- Winkler K, *see* Kuznetsov AV *et al.*
- Young PG, *see* Dibrov P *et al.*
- Zanetti R, Catalá A: Ascorbate-Fe²⁺ lipid-peroxidation of rat liver microsomes: Effect of vitamin E and cytosolic proteins 49-54
